

PRODUCT NAME

CREATUBE PIXELBAR SQUARE (500MM)

DESCRIPTION

The lighting method called creaTUBE Pixelbar Square is an innovative solution that consists of a rectangular LED strip measuring 18.5x18 mm. Thanks to the wide range of available connectors (straight 180°, angled 120° and three-armed), it is possible to create a variety of unusual shapes. The creaTUBE Pixelbar Square variants offered by SQM Rental House come in lengths of 1000, 500 and 300 mm.

Due to its strip-like design, creaTUBE Pixelbar Square emits light in a 270° range, presenting intense colors from a wide RGB palette. Installation of this lighting is very flexible - it can be placed on trusses, freestanding or on floor stands.

The LED strips can be linked together via DMX protocol and controlled via art.net protocol via a dedicated controller.

The creaTUBE Pixelbar Square lighting, with a length of 500 mm, is ideal for trade show applications, product backlighting, on stages and for decorative purposes.

SPECIFICATIONS

Technology	5050RGB
Technology	SK6812
Diode type	LED
Power (W)	6
IC driver	CL05
Length (mm)	500
Beam angle (°)	270
Supply voltage	24V DC
Width (mm)	18
Protection Level (IP)	IP65
Height (mm)	37
Connectors	2 x DMX (4-pin)
Net weight (kg)	0.32
