

PRODUCT NAME

CREATUBE 360 (1000MM)

DESCRIPTION

The creaTUBE 360 is an unconventional type of LED tube lighting, which offers endless possibilities to create unique shapes that give a spectacular effect.

Thanks to its design, creaTUBE offers a 360-degree beam of light with extremely vivid colors from the full RGB palette. Infinite creative possibilities are possible thanks to the 26-pin orbital connector, with the help of which the tubes can be connected at different angles. creaTUBE can also be installed on beams, as well as on floor stands - the limit of their use is only your imagination!

The tubes are connected to each other via DMX protocol and controlled via art.net protocol with a dedicated controller.

The creaTUBE 360 is perfect for ambient exhibition lighting, product lighting, stage lighting, or decorative lighting. Explore the possibilities of creaTUBE by renting it from SQM Rental House!

SPECIFICATIONS

Technology	5050RGB
Diode type	LED
IC driver	UCS1903
Length (mm)	996
Beam angle (°)	360
Supply voltage	24V DC
Diameter (mm)	40
Max. power consumption (W)	24
Protection Level (IP)	IP65
Connectors	1 x DMX (4-pin)
Net weight (kg)	0.53
