

PRODUCT NAME

IIYAMA B2791HSU

DESCRIPTION

SQM Rental House offers a solid, versatile and ergonomic Iiyama B2791HSU-W1 desktop monitor, which is perfect for continuous office work. The device is equipped with a TN LED matrix, which works on native Full HD (1920x1080) resolution and screen brightness of 300 nits.

B2791HSU-W1 is known for its Flicker-Free technology, which thanks to current regulation reduces flickering and limits the emission of the blue light which is the most harmful to the eye. The screen can be freely adjusted to the working conditions - it can be set in both landscape (horizontal) and portrait (vertical) positions. In addition, the height parameter is adjustable in the range of 130mm, and the foot can be rotated 45° to the right and 45° to the left. The screen can also be tilted 22° up and 5° down. In addition to the typical desktop application, B2791HSU-W1 can be hung on the wall - this is possible thanks to VESA mounts (100x100mm).

The Iiyama monitor is equipped with a number of connectors - three signal inputs (HDMI, DisplayPort, and HDMI) guarantee trouble-free connection of digital and anal video signals, and two USB 2.0 ports allow synchronization with external devices. In addition, the energy-saving screen consumes approx. 19W of power in standard operation mode.

Both great image quality parameters, as well as energy efficiency and a widescreen adjustment ability
