

PRODUCT NAME

CREATUBE 360 (1500MM)

DESCRIPTION

The creaTUBE 360 is a state-of-the-art LED tube light that allows you to create a variety of shapes for an impressive effect.

Thanks to its unique design, creaTUBE emits light with a full 360-degree angle, presenting intense colors from a rich RGB palette. Unlimited configuration possibilities are possible thanks to the 26-pin orbital connector, which allows the tubes to be connected at different angles. The mounting of creaTUBE is flexible - it can be placed both on beams and on floor stands, the only limit is your imagination!

The tubes connect to each other via DMX protocol and are controlled using art.net protocol with a dedicated controller.

With a length of 1500 mm, creaTUBE 360 is perfect for trade show lighting, product highlighting, stages or decorative purposes. Discover the potential of creaTUBE by renting it from SQM Rental House!

SPECIFICATIONS

Technology	5050RGB
Diode type	LED
IC driver	UCS1903
Length (mm)	1500
Beam angle (°)	360
Supply voltage	24V DC
Diameter (mm)	40
Max. power consumption (W)	24
Protection Level (IP)	IP65
Connectors	1 x DMX (4-pin)
