

PRODUCT NAME

CREATUBE PIXELBAR SQUARE (300MM)

DESCRIPTION

The lighting method known as creaTUBE Pixelbar Square represents an innovative approach, focusing on an 18.5x18 mm rectangular LED strip. With a variety of connectors (straight 180°, angled 120° and three-armed) it is possible to form unusual shapes. The creaTUBE Pixelbar Square variants offered by SQM Rental House are available in lengths of 1000, 500 and 300 mm.

Due to its strip-based design, the creaTUBE Pixelbar Square emits light at an angle of 120°, presenting a rich palette of intense RGB colors. The installation of this type of lighting is characterized by great flexibility - it can be placed on trusses, in a free-standing manner or on floor stands.

The LED strips can be connected via DMX protocol and controlled via art.net protocol using a special controller.

The 300mm long creaTUBE Pixelbar Square lighting is perfect for trade show applications, product highlighting, on stages and as a decorative element.

SPECIFICATIONS

Technology	SK6812
Technology	5050RGB
Diode type	LED
Power (W)	3.6
IC driver	CL05
Length (mm)	300
Beam angle (°)	120
Supply voltage	24V DC
Width (mm)	18
Protection Level (IP)	IP65
Height (mm)	37
Connectors	2 x DMX (4-pin)
Net weight (kg)	0.22
