

PRODUCT NAME

CREATUBE PIXELBAR SQUARE (1000MM)

DESCRIPTION

creaTUBE Pixelbar Square is an innovative method of lighting in the form of a rectangular LED strip with a cross-section of 18.5x18 mm. A wide range of connectors (straight 180°, 120° angled and three-armed) make it possible to create a variety of unconventional shapes. The creaTUBE Pixelbar Square variants offered at SQM Rental House are available in lengths of 1000, 500 and 300 mm.

Thanks to its strip-like design, creaTUBE Pixelbar Square emits light in a 330° range, presenting intense colors from a rich RGB palette. The installation of creaTUBE is flexible - it can be placed both on trusses, in free-standing form, and on floor stands.

The LED strips connect to each other via DMX protocol and are controlled via art.net protocol through a dedicated controller.

The creaTUBE Pixelbar Square, with a length of 1000 mm, is perfect for exhibition lighting, product backlighting, on stages or for decorative purposes.

SPECIFICATIONS

Technology	5050RGB
Technology	SK6812
Diode type	LED
Power (W)	13
IC driver	CL05
Length (mm)	1000
Beam angle (°)	330
Supply voltage	24V DC
Width (mm)	18
Protection Level (IP)	IP65
Height (mm)	37
Connectors	2 x DMX (4-pin)
Net weight (kg)	0.56
