

MIPRO ACT-32H

TECHNICAL DETAILS

Device type	Wireless microphone
Max. SPL (dB; @1m)	149
Frequency response (Hz)	50 ~ 20000
Sensitivity	-52dB
Microphone type	Condenser
Polar pattern	Supercardioid
Gain adjustment range (dB)	6 (-6dB, 0dB)
RF output (mW)	10
Microphone length (mm)	234
Microphone diameter (mm)	51
Microphone net weight (kg)	0.251

PRODUCT DESCRIPTION

Mipro ACT-32H is a wireless microphone equipped with a Mipro MU-80 condenser capsule.

The black-color microphone is equipped with an LCD screen, which indicates the group number, the selected channel or the battery status. ACT-32H has the Automatic Channel Targeting (ACT) function - thanks to it is possible to instantly synchronize the frequency of the microphone with the receiver. The device is powered by two AA alkaline batteries, which allow for about 12 hours of continuous operation. ACT-32H also allows a very simple and quick replacement of the microphone capsule.

For the functional ACT-32H microphone, SQM Rental House offers you a champagne-colored metal condenser capsule with supercardioid characteristics. MU-80, with a frequency range of 50 to 20,000 hertz, and sensitivity of -52dB, is defined by its high dynamic range and fast transient response. The capacitive capsule guarantees clean and detailed sound quality.
