

PRODUCT NAME

EUROTRUSS FD34-X (500X500MM)

DESCRIPTION

SQM Rental House presents Eurotruss FD34-X - 4-way corner X-piece truss, thanks to which it is possible to connect truss elements in four directions - each along two axes at an angle of 90°.

Like the FD34-T, the FD34-X is 500 millimeters lengthwise. The dimensions of the element's main tube are 50x2mm, and the braces - 20x2mm. As with the other elements of the FD34 series, the width and height of the element reach 290 millimeters, while the weight is 4.5 kg. The structure is made of durable EN AW 6082 alloy (AlSiMgMn), which is known for very good machinability, susceptibility to anodizing and strength.

Eurotruss FD34-X in the black color is a universal product that will allow the user to significantly diversify his design in an easy and fast way. SQM Multimedia Support recommends this product to you and encourages you to familiarize yourself with the other truss components available in our rental!

SPECIFICATIONS

Element	Corner
Color	Black
Material	EN AW-6082 T6
Length (mm)	500+500
Main tube diameter (mm×mm)	50x2
Braces (mm×mm)	20x2
Connection	CS1-CON
Width (mm)	290
Height (mm)	290
Net weight (kg)	4.5
