

PRODUCT NAME

BLACKMAGIC BIDIRECTIONAL SDI-HDMI 3G MICRO CONVERTER

DESCRIPTION

The Blackmagic BiDirectional SDI-HDMI 3G is a compact micro-converter that converts signals simultaneously in two directions and even in different formats - SDI to HDMI and HDMI to SDI.

The BiDirectional SDI-HDMI 3G Micro converter supports resolutions up to 1080p60 in HDMI and DCI 2K in SDI. Thanks to the SDI reclocking function, signal stability is guaranteed when using long cables.

The micro converter is equipped with an HDMI type A input/output, an SDI input (SD/HD/3G-SDI), and an SDI output that automatically matches the HDMI input - both on BNC connectors. Configurations, updates, and power supply via e.g. monitors or laptops are handled by a USB type C port. The power supply is also possible via a power adapter.

Rent a robust, pocket-sized bi-directional micro-converter today at SQM Rental House!
