

PRODUCT NAME

GJ-I8 MINI KEYBOARD

DESCRIPTION

The GJ-I8 is a wireless QWERTY keyboard with a built-in touchpad and gesture support - it replaces a mouse and keyboard by simply plugging in a USB receiver. The GJ-I8 operates in the 2.4 GHz band.

The keyboard is perfect for writing, gaming, or standard operation with a monitor, TV, computer, projector, or console. The GJ-I8 is compatible with Windows, Mac OS, Linux, iOS, and Android. It also works with Smart TV, Xbox and Playstation, Kodi dashboard, and Raspberry Pi (XBMC, OSMC).

The built-in touchpad reacts to certain gestures - clicking with one finger serves as LMB (left mouse button), holding down two fingers serves as scrolling, while pressing three fingers works as RMB (right mouse button). The keyboard is equipped with many function keys.

The operating range of the device is 15 m, while the speed of transmission is 1 Mbps. The product has a Li-Ion battery with a capacity of 810 mAh, which is charged via micro USB port. The kit includes a keyboard with a battery, USB receiver, and USB - micro USB cable.
