

AUDIO-TECHNICA AT2020

TECHNICAL DETAILS

Device type	Microphone
Frequency response (Hz)	20 ~ 20000
Dynamic range (dB)	124 (1kHz / max. SPL)
Signal-to-noise ratio	74dB (1kHz @ 1Pa)
Connectors	1 x XLR (3-pin, Output)
Output impedance (Ω)	100 (XLR)
Diameter (mm)	52
Height (mm)	162
Net weight (kg)	0.345
Polar pattern	Cardioid

PRODUCT DESCRIPTION

The AT2020 is a large-diaphragm condenser microphone with a cardioid (120°) characteristic from the world-renowned Japanese consortium Audio-Technica.

The Audio-Technica AT2020 has been developed for use in studio environments - the unit features a lightweight diaphragm optimized for a wide frequency response (20 Hz ~ 20 kHz). Thanks to its wide dynamic range, the microphone can easily handle high sound levels. The sensitivity of the microphone is -37dB (1V at 1Pa).

Available from a wide range of microphones at SQM Rental House, the AT2020 is fitted with a male 3-pin XLR type output. The unit requires phantom power (+48V).

With the microphone, we include for you a stand mount for 5/8" threaded stands, a 5/8" - 3/8" threaded adapter, and a protective pouch.
