Height (mm)	104
Depth (mm)	85
Net weight (kg)	1.04
Set contains	Remote control
Set contains	USB-A - USB-C cable
Set contains	Power supply
Set contains	Wall mount

PRODUCT DESCRIPTION

The Logitech MeetUp is an all-in-one conference camera for small rooms that boasts 4K video support with 5x zoom, a built-in microphone and wideband speaker system, and a wide vertical and horizontal panning lens with a great field of view.

With RightSight computer vision technology, the Logitech MeetUp camera automatically adjusts the position, zoom, and detection and framing of conversation participants. An advanced 4K image sensor ensures image clarity even when zooming in five times, and RightLight technology compensates for low ambient light, reducing video noise and optimizing saturation. The microphone's 90 Hz to 16,000 Hz frequency response ensures pristine voice reproduction and clear, noise-free speech.

The Logitech MeetUp camera with a 120-degree field of view makes it extremely easy to support conference rooms, with up to eight people recommended.

The rental kit from SQM Rental House includes an charger, wall mount, 5-meter USB-A - USB-C cable and remote control for the camera. Our paid accessories also include a bracket for mounting the camera on a TV set and an additional extension microphone with mute button - the microphone extends the range of sound recording.
