

RØDE WIRELESS GO II

TECHNICAL DETAILS

Device type	Receiver
Device type	Transmitter
Max. SPL (dB; @1m)	100
Working range (m)	200
Frequency range (Hz)	50 ~ 20000
Connectors	2 x 3.5mm TRS (Audio input/output)
Connectors	1 x USB-C
Width (mm)	45.3 (Transmitter)
Width (mm)	45.5 (Receiver)
Height (mm)	18.3 (Receiver)
Height (mm)	18.3 (Transmitter)
Depth (mm)	44 (Receiver)
Depth (mm)	44 (Transmitter)
Net weight (kg)	0.032 (Receiver)
Net weight (kg)	0.03 (Transmitter)
Set contains	1 x RØDE SC5 (3.5mm jack cable)
Set contains	1 x Pouch bag
Set contains	3 x RØDE SC20 (USB-C cable)
Set contains	3 x Furry
Set contains	1 x RØDE SC15 (USB-C - Lightning 300mm cable)
Polar pattern	Omnidirectional

PRODUCT DESCRIPTION

The RØDE Wireless GO II is a wireless audio system that consists of two transmitters with built-in high-quality microphones and one receiver for simultaneous capture of two audio sources.

The Wireless GO II allows direct audio recording without the need for an external SD card - all thanks to its built-in lithium-ion battery (with a lifespan of up to approximately 7 hours). Backup is available in post-production when there are interruptions or audio problems.

Wireless GO II allows you to switch between mono or stereo, so you can record each transmitter separately. The system uses 2.4 GHz digital transmission with 128-bit encryption, which provides a working range of up to 200 m.

The receiver is equipped with an LED display that indicates the audio level, receiver/transmitters battery level, and signal strength. There is also a USB-C port, which allows you to connect, for example, to a laptop, and a 3.5-millimeter TRS output. In addition to the USB-C port and TRS microphone input, the transmitter is equipped with a built-in high-quality omnidirectional condenser capsule and LEDs indicating battery status and connection status with the receiver.

The kit comes with 3 RØDE SC20 (USB-C) cables, an RØDE SC5 (3.5-mm jack) cable that can be used to connect the headset to e.g. a camera, an RØDE SC15 USB-C - Lightning cable that allows you to connect the Wireless GO II headset to iOS devices, a carrying case and furry wind protection covers.

Rent the fantastic RØDE Wireless GO II audio system for your event today at SQM Rental House!
