

ELECTRO-VOICE ELX200-12P

TECHNICAL DETAILS

Speaker category	Stage speaker
Speaker type	Active
Max. SPL (dB; @1m)	130
Frequency response (Hz)	57 ~ 16000 (-3dB)
Frequency range (Hz)	51 ~ 20000 (-10dB)
LF transducer	1 x 12" EVS-12M
HF transducer	1 x 1" DH-1L
Nominal coverage (h/v; °)	90/60
Continuous power (W)	300
Peak power (W)	1200
Connectors	2 x RCA (Stereo input)
Connectors	2 x XLR/TRS Combo jack (Input)
Connectors	1 x XLR (3-pin, Output)
Width (mm)	363
Height (mm)	629
Depth (mm)	344
Net weight (kg)	15.6

PRODUCT DESCRIPTION

The Electro-Voice ELX200-12P is an active stage loudspeaker equipped with a 12-inch EVS-12M woofer, a 1-inch DH-1C titanium tweeter, and a class-D amplifier that offers a maximum power of 1200 watts (and a continuous power of 300 watts).

The high-quality drivers guarantee a maximum SPL of 130 dB (measured from 1 meter), and the equipment covers frequencies from 57 to 16,000 Hz. The ELX200-12P offers such features as a three-band equalizer, presets for instant setup of the operating mode (Music, Live, Speech, Club), as well as a crossover that adjusts frequency ranges. An LCD display located on the rear of the column allows monitoring the operation of controllers, limiters, or output level meters.

The Electro-Voice ELX200-12P wide-band active stage loudspeaker is equipped with a stereo input (2 x RCA), XLR/TRS combo input and XLR output. The 15.6-kilogram loudspeaker with a polypropylene housing and black steel grill can be mounted thanks to three M10 threads. The ELX200-12P can also be controlled from the QuickSmart Mobile app (the ability to control and monitor six ELX200 series speakers simultaneously).
