

PRODUCT NAME

SHURE SM57

DESCRIPTION

Shure SM57 is a dynamic microphone with cardioid characteristics.

The versatile SM57 will be perfect on stage as well as in the studio - it reproduces sounds perfectly and does not distort the sounds of instruments and amplifiers. Uniform cardioid characteristic and pneumatic anti-shake system ensure sound reproduction without noise and interference. The device transmits frequencies in the band from 40 to 15,000 Hz.

The Shure SM57 is equipped with a 3-pin XLR-type output. The diameter of the capsule is 32 millimeters, while the diameter of the handle is about 23 mm.

The kit available for rental at SQM Rental House includes a microphone case and a swivel microphone stand adapter.

SPECIFICATIONS

Device type	Microphone
Frequency response (Hz)	40 ~ 15000
Sensitivity	-56dBV/Pa (1.6mV)
Output impedance (Ω)	310
Microphone type	Dynamic
Polar pattern	Cardioid
Microphone diameter (mm)	32 (Capsule)
Microphone diameter (mm)	23
Connectors	1 x XLR (3-pin, Output)
Net weight (kg)	0.284
