

PRODUCT NAME

BOSE S1 PRO

DESCRIPTION

The Bose S1 Pro is an all-in-one portable PA speaker that features a three-channel mixer. For the first two channels (balanced XLR/TRS combo inputs), in addition to adjusting the volume level parameter, it is possible to adjust tone, reverb and customize ToneMatch presets (vocal, acoustic guitar, off). On channel three, meanwhile, it's possible to stream music via Bluetooth 4.2 (or via the dedicated Bose Connect app), or with the use of a 3.5-millimeter jack (AUX).

The S1 Pro system also has a line output to allow expansion to other systems, and a MicroUSB service port.

The Bose S1 Pro features a 6-inch woofer and three 2.25-inch drivers with a total RMS power of 160 watts, which will cover an event for about 50 people.

Maximum SPL is 103dB, and the coverage angle is 100° for horizontal and 40° for vertical. The wireless communication range is up to 9 meters. In addition, the system is equipped with multi-position sensors for optimal sound in any position of the device - as a speaker on a stand, in a monitor position, free-standing, or tilted. The compact size and weight of slightly more than 6 kg allow you to use the powerful PA system in any location during your event.
