| Connectors | 1 x Ethernet (RJ45) |
| Connectors | 1 x HDMI (Output) |
| Max. power consumption (W) | 150 |
| Width (mm) | 197 |
| Height (mm) | 36 |
| Depth (mm) | 197 |
| Net weight (kg) | 1.2 |
| Set contains | Power cord |

PRODUCT DESCRIPTION

The Mac mini is SQM Rental House's recommended miniature computer from Apple in color silver.

The Mac mini features Apple's extremely powerful M1 SoC chipset, which includes an 8-core CPU, an 8-core graphics unit and a 16-core Neural Engine system. The mini-PC has 8GB of unified RAM and 256GB of SSD storage.

The compact PC from Apple features 1 HDMI output with support for multi-channel audio and 2 Thunderbolt 3/USB 4 ports on USB-C 3.1 Gen 2 connectors, which support, inter alia, simultaneous dual-monitor display (e.g., in the configuration of one monitor plugged into the Thunderbolt port, which allows 6K resolution at 60Hz, and another plugged into the HDMI port with 4K resolution and refresh rate at 60Hz). Thunderbolt 3 supports native DisplayPort (USB-C) output, as well as Thunderbolt 2, DVI and VGA with an optional adapter. The Mac mini M1 also has two USB-A ports (with up to 5Gbps write speeds), a headphone jack on a 3.5mm connector, and an RJ45 Gigabit Ethernet 10/100/1000BASE-T port (which can be set up with a 10Gbps Ethernet port). The Mac mini also has a built-in speaker.

Weighing just 1.2kg, the mini-computer supports WiFi 6 (802.11ax), WiFi 802.11a/b/g/n/ac and Bluetooth 5.0. The device is powered at 100-240V AC, with a maximum power consumption of 150W.
