PRODUCT DESCRIPTION

SQM Rental House recommends the Iiyama TF5539UHSC-W1AG, a 55-inch open-frame touchscreen monitor in color white.

The device features an IPS matrix with 4K UHD native resolution (3840x2160), 15 points of capacitive touch technology, and a 6-millimeter-thick anti-reflective glass coating that guarantees glare-free content presentation at wide viewing angles (178°/178°).

The touch technology used on the TF5539UHSC-W1AG is HID-compatible and works on a plug-and-play basis with Windows and Linux. Apple-branded devices require a driver that supports a single touch point.

The Iiyama TF5538UHSC offers 2 HDMI inputs as well as one DisplayPort and VGA input each. Meanwhile, an external control panel can be connected via one of the RJ45 ports. Two built-in 8W speakers are responsible for the sound. The screen is designed to work in both horizontal, vertical and face-up positions. The 600x400mm mounts are compatible with the VESA standard and allow the device to be hung on a stand or wall without any problems.

Iiyama TF5539UHSC-W1AG is a monitor tailored for digital signage solutions - for example, as an interactive information kiosk, as well as an interactive tool for presenting your content at the stand.
