

## DJI RONIN-SC

### TECHNICAL DETAILS

Category	Gimbal
Battery	LiPo 2450mAh built-in battery (17.64Wh, lithium-polymer)
X-axis - Tilt (°)	-202.5/+112.5 (Mechanical endpoint range)
X-axis - Tilt (°)	-90/+145 (Controlled rotation range)
Y-axis - Pan (°)	360 (Mechanical endpoint range)
Y-axis - Pan (°)	360 (Controlled rotation range)
Z-axis - Roll (°)	±30 (Controlled rotation range)
Z-axis - Roll (°)	-95/+220 (Mechanical endpoint range)
Connectors	1 x USB-C
Max. capacity (kg)	2
Width (mm)	370 (Unfolded)
Width (mm)	220 (Folded)
Height (mm)	165 (Unfolded)
Height (mm)	200 (Folded)
Depth (mm)	150 (Unfolded)
Depth (mm)	75 (Folded)
Net weight (kg)	0.258 (BG18 grip)
Net weight (kg)	0.83 (Gimbal)
Net weight (kg)	0.16 (tripod)
Set contains	1 x Lens support
Set contains	1 x Gimbal Ronin-SC
Set contains	2 x Wrench
Set contains	1 x Extended grip / tripod

Set contains	4 x Screw M4
Set contains	1 x Camera riser
Set contains	1 x Multi-Camera Control cable (USB-C)
Set contains	1 x Phone holder
Set contains	1 x Multi-Camera Control adapter (USB-C - Micro-USB)
Set contains	1 x USB adapter
Set contains	2 x 8-pin port cover
Set contains	1 x BG18 grip with built-in battery
Set contains	3 x Camera screw 1/4"-20
Set contains	1 x Quick-Release plate
Set contains	1 x Multi-Camera Control cable (Multi-USB)
Set contains	1 x Carrying case
Set contains	1 x USB-A - USB-C cable

## PRODUCT DESCRIPTION

The DJI Ronin-SC is a three-axis universal stabilizer for mirrorless cameras and smartphones that features excellent stabilization levels, a wide range of movement in all axes (including continuous 360° rotation in the Y-axis (Pan)), and a lightweight yet durable design.

The Ronin-SC gimbal offers a range of automatic functions, such as Panorama, Timelapse, Motionlapse and Motion Control, and thanks to ActiveTrack 3.0 technology that connects to the dedicated Ronin app, it is possible to smoothly and precisely track a selected object or person. The app itself, meanwhile, enables intuitive and quick stabilizer configuration - thus automating the process of manually tuning the equipment.

Ronin-SC allows you to lock the axes in each arm, making them easier to balance. Thanks to the mounting plate, on the other hand, it is possible to maintain the optimal position of the device and its mounting is streamlined.

The built-in 2450mAh lithium-polymer battery allows about 11 hours of continuous operation (charging time is about 2.5 hours). Connectivity to the gimbal is possible via Bluetooth 5.0 (2.4GHz frequency and transmission power <8dBm) and via USB-C port.

Rent the reliable DJI Ronin-SC stabilizer at SQM Rental House and use its power to create fantastic shots.
