| Net weight (kg) | 0.265 |

PRODUCT DESCRIPTION

The Panasonic LUMIX G Vario H-FS14140 is a compact and lightweight high zoom lens (14-140mm, 35mm camera equivalent: 28-280mm) with high optical performance.

The H-FS14140 is built with 14 lenses in 12 groups, including three aspherical lenses and two ED lenses.

The aperture consists of seven blades, and the lens itself, equipped with an optical image stabilizer (POWER O.I.S.), mounts on a micro standard Four Thirds base. The equipment also offers seals that protect the inside of the lens from splash and dust.
