Power supply	110/240V AC
Width (mm)	482.6
Height (mm)	44.45 (1U)
Depth (mm)	136
Net weight (kg)	1.8

PRODUCT DESCRIPTION

Swisson UM XND-8R5 is a converter from Art-Net / sACN to 8 independent and optically isolated DMX ports, where each port can be configured as input or output.

The XND-8 converter will also be great for transmitting DMX data from a computer or mobile device. In addition to 8 DMX ports (on 5-pin XLR connectors) and an etherCON (RJ45) connector, the device is equipped with a USB-B port (for software updates) and a powerCON input/output.

The front panel of the XND-8R5 converter features a 128x64 OLED display, which, along with a knob, allows network configuration, manual setting of Art-Net and sACN preferences, and information monitoring.
