Connectors	1 x DMX (XLR 3-pin, Link)
Connectors	1 x DMX (XLR 3-pin, Input)
Connectors	1 x DMX (XLR 5-pin, Link)
Power supply	240V AC; 50Hz
Width (mm)	483
Height (mm)	44.45 (1U)
Depth (mm)	134
Net weight (kg)	2.5

### PRODUCT DESCRIPTION

The Showtec DB-1-8 is an eight-channel universal DMX splitter/booster that features eight DMX outputs (on 3-pin XLR connectors), one DMX input each (3-pin and 5-pin, XLR) and two thru sockets. The equipment uses galvanic isolation for input-output.

The front panel of the DB-1-8 splitter also has LEDs indicating DMX input and output signals. The rear panel is equipped with an M10 mounting thread so that the booster/splitter can be installed, for example, on a truss. The size of the device allows for standard 19" rack mounting.

Rent the Showtec DB-1-8 universal splitter at SQM Rental House.
