Supported video formats	1920x1080 (60p)
Connectors	1 x Micro USB
Connectors	1 x HDMI
Connectivity	WiFi 802.11n

PRODUCT DESCRIPTION

MiraScreen K6 is a 2.4GHz Wi-Fi transmitter for HDMI input with the required MHL function, which allows cloning video from a mobile device to a TV.

The transmitter supports AirPlay, DLNA and MiraCast - the purpose of the device is to transmit video and audio from a phone, computer or tablet directly to a TV, projector or monitor with HDMI input. When connected to a second computer, the transmitter makes it possible to extend the desktop with another monitor. The transmitter does not require drivers, it works on a plug-and-play basis.

MiraScreen K6 supports resolutions from 1280x720 (60p) to 3840x2160 pixels (at 30p). Supported formats include DTS-HD, Dolby True HD and AC3, DTS, LPCM7.1, as well as DSD. The transmitter is powered by a microUSB port.
