

SENNHEISER EW-D SK BASE SET (S1-7: 606.2-662 MHZ)

TECHNICAL DETAILS

Device type	Transmitter
Device type	Receiver
Operating frequency (MHz)	606.2 ~ 662
Frequency response (Hz)	20 ~ 20000 (±3dB)
Connectors	1 x 6.3mm jack (Output)
Connectors	2 x Antenna (Input)
Connectors	1 x XLR (3-pin, Output)
Width (mm)	63 (Transmitter)
Width (mm)	212.1 (Receiver)
Height (mm)	80 (Transmitter)
Height (mm)	44.2 (Receiver)
Depth (mm)	20 (Transmitter)
Depth (mm)	188.7 (Receiver)
Net weight (kg)	1 (Receiver)
Net weight (kg)	0.12 (Transmitter)
Set contains	Power supply
Set contains	2 x Rod antenna
Set contains	1 x Headset microphone
Set contains	1 x EW-D EM rack receiver
Set contains	1 x EW-D SK bodypack transmitter

PRODUCT DESCRIPTION

Rent the Sennheiser EW-D SK BASE SET S1-7 digital wireless set at SQM Rental House. The set, which operates in the frequency range from 606.2 to 662 MHz, consists of the EW-D EM rack receiver and EW-D SK bodypack handheld transmitter. The EWD series microphone can be easily matched with the system.

EWD series units are known for their use of a parallel tuning grid and components of very good quality and linearity, so that intermodulation between transmitters is eliminated, and thus equal spacing for frequencies (every 600 kHz) is possible. The kit also has an extended 56MHz tuning bandwidth and scalability to 90 channels, and the audio input dynamic range of 134dB eliminates the need to adjust sensitivity with every detail.

The rear panel of the EW-D EM receiver features a balanced output (XLR) and an unbalanced audio output (6.3mm jack). The set can be controlled via Bluetooth, using the dedicated Sennheiser Smart Assist app. The EW-D SK bodypack transmitter is powered by 2 AA batteries or a BA 70 rechargeable battery.

The compact, wireless Sennheiser EW-D SK BASE SET S1-7 operating at 606.2 - 662MHz is rented with a headset microphone.
