PRODUCT DESCRIPTION

The Sennheiser ME 4 is a clip-on condenser microphone that is compatible with the EW-D series of transmitters, among others.

The ME 4 is designed for vocal applications in noisy environments. The condenser capsule with cardioid characteristic guarantees high resistance to acoustic feedback. The microphone is equipped with a TRS connector on a 3.5-millimeter jack, which allows the microphone to be connected to bodypacks.

Available for rental at SQM Rental House, the ME 4 microphone is rented together with the MZQ 02 clip and MZW 4 wind shield.
