The Flex stand with Maxi Case is characterized by elegance and aesthetic organization of cabling - all cables are routed inside the stand arm. The rear panel, on which the protective lock is placed, is made of durable ABS. The front panel, on the other hand, was created from stainless steel (powder-coated in white). The design of the front panel allows access to the home button and camera.

The stand can be installed in the base in two ways: - from below - the thickness of the base must be less than 25 millimeters - in this case, the depth of the stand is 265 mm; - from above - the thickness of the base must be greater than 34 millimeters - in this case, the depth of the stand is 271 mm.

Full installation instructions are included in the attachment below.
