PRODUCT DESCRIPTION

The Neomounts FL55-875BL1 is a mobile floor stand designed for displays with diagonal sizes from 37 to 100 inches and a maximum weight of 110 kg.

The floor stand features motorized height adjustment (at a speed of 35 mm/sec) from 1019 to 2127 mm, controlled by a wired remote control. The model also features an anti-collision system for added safety. An equipment storage compartment with cable hole can be installed on the back of the stand.

The floor stand is equipped with convenient handles and four sturdy 10 cm casters with a double-locking mechanism, allowing the floor stand to be moved and used anywhere. Aesthetic cable management is provided by an internal masking system that guides cables from the floor stand to the display. A convenient cable management bracket on the back of the cart allows for easy and safe relocation. In addition, the bottom of the cart includes a space with cable tie holes for mounting the power strip.

The mounted display can be secured by locking the brackets with a padlock. The Neomount FL55-875BL1 stand supports VESA standard mounting sizes from 100x100 to 800x600 mm. The black steel stand is available for rental from SQM Rental House.
