

3D HOLO FAN Z3H (65CM)

TECHNICAL DETAILS

Diode type	960 (4 x 240) x LED RGB0805 diode
Max. brightness (cd/m²)	4500
Viewing angles (h/v; °)	170/170
Supported video formats	.mp4; .avi; .rmvb
Supported image formats	.jpg
Rotating speed (rpm)	700
Material	ABS; Aluminium
Working Environment	indoor
Max. power consumption (W)	60
Supply voltage	100-240V AC; 50/60Hz
Diameter (mm)	650
Depth (mm)	55
Net weight (kg)	0.77
Net weight (kg)	0.58

PRODUCT DESCRIPTION

The Z3H is another holo fan model in SQM Rental House's 3D LED product range, which uses holographic technology to create mesmerizing 3D multimedia shows. This model is equipped with 960 RGB0805 LEDs (240 per arm) and offers a rotation speed of 700 rpm. This equipment can be freely combined among each other, thus creating a wall created from up to dozens of LED fans (also as a single column or row).

The Z3H fan is operated via an iOS/Android app or via remote control and Bluetooth. The hardware supports .mp4, .avi and .rmvb video formats and .jpg images. The fan is equipped with a slot for a MicroSD card, through which you can play media transferred, for example, from a laptop.

The device offers a wide viewing angle (170 degrees), allowing viewers to observe holographic projections from different perspectives, making the fan ideal for larger events or exhibitions. The holo fan is suitable for presenting animations indoors. The diameter of the fan after mounting the arms is 650 mm, while the depth is 55 mm.
