

ALUSTAGE AL34300 QUADRO 290A TRUSS (3000MM)

TECHNICAL DETAILS

Element	Straight truss
Color	Black
Length (mm)	3000
Material	EN AW-6082 T6
Main tube diameter (mm×mm)	50x2
Braces (mm×mm)	20x2
Width (mm)	290
Height (mm)	290
Net weight (kg)	15.6
Connection	SZ02.10

PRODUCT DESCRIPTION

Alustage AL34300 is a straight quadro truss with a length of 3000 mm, which belongs to the 290A system and AL3 series. The weight of the component is 15.6 kg.

The 290A system is manufactured from hardened EN AW 6082 T6 (AlSiMgMn) alloy, which is known for its very good machinability, high strength and good anodizing susceptibility.

Truss elements from the 290A system are made of 50x2mm diameter tubes, 20x2mm sized braces and are equipped with SZ02.10 connection socket. Alustage systems are successfully used as elements of structures used at exhibitions, stages, events, video screens, or as frames for LED screens, projection screens, as well as sound gates. They are also great as frames for advertising or stage decorations.

Each component is certified and periodically inspected closely to ensure safe operation.
