

ALUSTAGE AL34C21 QUADRO 290A TRUSS L CORNER (500x500MM)

TECHNICAL DETAILS

Element	Corner
Color	Black
Length (mm)	500+500
Material	EN AW-6082 T6
Main tube diameter (mm×mm)	50x2
Braces (mm×mm)	20x2
Width (mm)	290
Height (mm)	290
Net weight (kg)	4.8
Connection	SZ02.10

PRODUCT DESCRIPTION

Alustage AL34C21 is a two-way quadro corner with a 90-degree angle, where each of the longer sides is 500 mm long. The element belongs to the 290A system and AL3 series, and its weight is 4.8 kg.

The AL34C21 corner is ideal for connecting straight truss elements.

Truss elements from the 290A system are made of 50x2mm diameter tubes and 20x2mm sized braces. The corner is equipped with a SZ02.10 socket. The 290A system is manufactured from hardened EN AW 6082 T6 (AlSiMgMn) alloy - known for its excellent machinability, good anodizing susceptibility and high strength.

Alustage systems are ideal as structural elements, which are used at exhibitions, stages and any other events. They will ideally serve as suspensions for LED screens, projection screens and sound gates. They will also work great as frameworks for advertising or stage decorations.

Each of the truss elements available for rent at SQM Rental House is certified and periodically subjected to a thorough inspection, thus guaranteeing safe operation.
