

## ALUSTAGE AL34C41 QUADRO 290A TRUSS X CORNER (500x500MM)

### TECHNICAL DETAILS

Element	Corner
Color	Black
Length (mm)	500+500
Material	EN AW-6082 T6
Main tube diameter (mm×mm)	50x2
Braces (mm×mm)	20x2
Width (mm)	290
Height (mm)	290
Net weight (kg)	6.1
Connection	SZ02.10

### PRODUCT DESCRIPTION

Alustage AL34C41 is an X-type (quadro) corner element that offers a truss connection in four directions at 90 degrees. The length of the element is 500 mm of each side. The corner piece belongs to the 290A system and AL3 series and weighs 6.1 kg.

The AL34C41 corner is ideal for connecting straight truss elements. Elements from the 290A system are made of 50x2 mm diameter tubes and 20x2 mm laths. The corner is equipped with a socket SZ02.10.

The 290A system is manufactured from hardened EN AW 6082 T6 (AlSiMgMn) alloy - known for its excellent machinability, good anodizing susceptibility and high strength.

Alustage systems are ideal as structural elements that are used at trade shows, stages and other events. They are ideal as suspensions for LED screens, projection screens and sound gates. They will also work great as racks for advertisements or stage decorations.

Each of the truss elements available for rent at SQM Rental House is certified and subjected to periodic detailed inspections, thus guaranteeing safe operation.
