

## ALUSTAGE AL34T35 QUADRO 290A TRUSS T CORNER (500x500MM)

### TECHNICAL DETAILS

|                            |               |
|----------------------------|---------------|
| Element                    | Corner        |
| Color                      | Black         |
| Length (mm)                | 500+500       |
| Material                   | EN AW-6082 T6 |
| Main tube diameter (mm×mm) | 50x2          |
| Braces (mm×mm)             | 20x2          |
| Width (mm)                 | 290           |
| Height (mm)                | 290           |
| Net weight (kg)            | 5.3           |
| Connection                 | SZ02.10       |

### PRODUCT DESCRIPTION

Alustage AL34T35 is a T-type (quadro) corner that offers a truss connection in three directions, including one at 90 degrees. The length of the element is 500 mm. The corner belongs to the 290A system and the AL3 series, and weighs 5.3 kg.

The AL34T35 corner is an ideal solution for connecting straight truss elements. Elements from the 290A system are made of 50x2 mm diameter tubes and 20x2 mm braces. The corner is equipped with a socket SZ02.10.

The 290A system is manufactured from hardened EN AW 6082 T6 (AlSiMgMn) alloy - known for its excellent machinability, good anodizing susceptibility and high resistance.

Alustage systems are ideal as structural elements used at trade shows, stages and other events. These systems are perfect as suspensions for LED screens, projection screens and sound gates. They will also work great as advertising stands or stage decorations.

Each of the truss elements available for rent at SQM Rental House is certified and subjected to periodic detailed inspections, thus guaranteeing safe operation.
