

ALUSTAGE AL32100 DUO 290A TRUSS (1000MM)

TECHNICAL DETAILS

Element	Straight truss
Color	Black
Length (mm)	1000
Material	EN AW-6082 T6
Main tube diameter (mm×mm)	50x2
Braces (mm×mm)	20x2
Height (mm)	290
Net weight (kg)	2.5
Connection	SZ02.10

PRODUCT DESCRIPTION

Alustage AL32100 is a straight (duo) truss with a length of 1000 mm, belonging to the 290A system and AL3 series. The weight of the component is 2.5 kg.

The 290A system is manufactured from hardened EN AW 6082 T6 (AlSiMgMn) alloy, which is known for its very good machinability, high strength and good susceptibility to anodizing.

The grating elements of the 290A system are made of tubes (with a diameter of 50x2 mm) and laths with a diameter of 20x2 mm. The grating is equipped with a connection socket SZ02.10.

Alustage systems are perfect as structural elements for trade fairs, stages or events. These are elements adapted for suspension of telebims, LED screens, projection screens, as well as sound and lighting gates. They also work great as frames for advertising or stage decorations.

Each component is certified and periodically inspected to ensure safe operation.
