Width (mm)	290
Height (mm)	290
Depth (mm)	290
Net weight (kg)	9.78
Connection	SZ02.10

PRODUCT DESCRIPTION

Alustage AL34BOX is a cornerbox quadro truss with six directions and eight pins, which belongs to the 290A system and AL3 series. The element is tall, wide and 290 mm deep, while the weight of the cornerbox is 9.78 kg.

The elements included in the 290A system are made of hardened EN AW 6082 T6 (AlSiMgMn) alloy, excellent for its ease of machining, high strength and good susceptibility to anodizing. The tubes used in the trusses of this system are 50x2 mm in diameter, and the fins are 20x2 mm. In addition, this system has a connection socket SZ02.10.

Alustage trusses are ideal for stage applications at trade shows, stages and events. They can also be used as elements for hanging video screens, LED screens, projection screens and sound gates. In addition, they can be used as advertising stands or stage decorations. It is worth noting that each element is certified and regularly inspected to ensure safety.

Take advantage of the Alustage AL34BOX cornerbox rental offer from SQM Rental House for your event!
