

CREATUBE 360 (500MM)

TECHNICAL DETAILS

Technology	5050RGB
Diode type	LED
Length (mm)	500
Beam angle (°)	360
IC driver	UCS1903
Connectors	1 x DMX (4-pin)
Protection Level (IP)	IP65
Max. power consumption (W)	24
Supply voltage	24V DC
Diameter (mm)	40

PRODUCT DESCRIPTION

The creaTUBE 360 is an innovative LED tube light that allows you to create a variety of shapes for a spectacular effect.

Thanks to its unique design, creaTUBE emits light with a 360-degree angle, presenting intense colors from a wide RGB palette. The ability to create unlimited configurations is made possible by the 26-pin orbital connector, which allows the tubes to be connected at different angles. The mounting of creaTUBE is flexible - it can be placed both on beams and on floor stands, the only limit is your imagination!

The tubes connect to each other using DMX protocol and are controlled using art.net protocol with a dedicated controller.

With a length of 500 mm, the creaTUBE 360 is ideal for use as lighting at trade shows, for product highlighting, on stages or for decorative purposes. Discover the potential of creaTUBE by renting them from SQM Rental House!
