

P1.9 KINETIC LED WALL

TECHNICAL DETAILS

Pixel pitch (mm)	1.9
Module width (mm)	250 (1×1)
Module height (mm)	250 (1×1)
Gap between modules (mm)	2
Cabinet width (mm)	502 (2×2)
Cabinet height (mm)	502 (2×2)
Cabinet depth (mm)	380
Forward stroke (mm)	300
Stroke speed (mm/s)	300
Module resolution (px×px)	128x128
Resolution (px×px)	256x256
Max. brightness (cd/m²)	800
Refresh Rate (Hz)	3840
Working Environment	indoor
Maintenance	Front / Rear
Max. power consumption (W)	1284 (/m2)
Net weight (kg)	28 (2×2)

PRODUCT DESCRIPTION

Kinetic LED Wall is a revolutionary product in the range of LED screens that introduces a whole new standard of visual presentations. With its motion technology, the Kinetic LED Wall and its pixel spacing of 1.9 mm, this screen provides unparalleled image quality and exceptional flexibility in application. It is the ideal solution for spaces that require superior visual quality and dynamic effects.

The screen features excellent resolution (128x128 pixels per module), which, thanks to its dense pixel spacing of 1.9 mm, guarantees a crystal-clear image, regardless of viewing distance. With its high brightness (800 nits) and wide color range, the Kinetic LED Wall presents an image with vivid colors and deep contrast, making it ideal for unconventional multimedia shows and art installations.

One of the most unique features of this model is its ability to move kinetically. Thanks to advanced mechanisms, the screen can change its configuration, creating dynamic, three-dimensional visual effects. One module can create a spatial effect, going out by 300 mm at a speed of 300 mm/s. With a distance of 2 mm between modules, the whole creates a coherent and seamless effect.

The kinetic functionality opens up new possibilities for designers and artists to create immersive and interactive environments that engage viewers on an unprecedented scale.

Available at SQM Rental House, the Kinetic LED Wall is the future of visualization - a screen that not only shows an image, but also creates it. Combining superior image quality with dynamic kinetic capabilities, this LED screen is the perfect choice for those looking for innovative visual display solutions.
