TRANSPARENT OLED 55" DIGITAL SIGNAGE

TECHNICAL DETAILS

Diagonal (in)	55
Panel	OLED
Standard	Full HD
Transparency (%)	38
Resolution (px×px)	1920x1080
Width of viewable area (mm)	1209.73
Height of viewable area (mm)	680.5
Upper / lower bezel size (mm)	7.9 / 121.7
Left / right bezel size (mm)	7.9 / 7.9
Screen aspect ratio	16:9
Max. brightness (cd/m²)	400
Viewing angles (h/v; °)	178/178
Connectors	2 x Ethernet (Input/output, RJ45)
Connectors	2 x DisplayPort (Input/output)
Connectors	2 x RS-232C (Input/output, 9-pin D-Sub)
Connectors	1 x 3.5mm jack (IR)
Connectors	2 x USB-A
Connectors	1 x HDMI (Input)
Connectors	1 x 3.5mm jack (Audio output)
Max. power consumption (W)	318
Width without stand (mm)	782.8 (Digital Signage)
Width without stand (mm)	1225.53
Height without stand (mm)	238.4 (Digital Signage)

Height without stand (mm)	810.1
Depth without stand (mm)	34.7 (Digital Signage)
Depth without stand (mm)	6.6
Net weight (kg)	13.9
Net weight (kg)	3.4 (Digital Signage)

PRODUCT DESCRIPTION

Transparent OLED Digital Signage is a monitor that changes the way content is presented. Thanks to innovative OLED technology, this screen offers extraordinary image quality, combining exceptional transparency with deep blacks and intense colors. Its transparent design allows digital content to blend harmoniously into its surroundings, making this monitor act not only as a screen, but also as a decorative interior element.

The monitor uses advanced OLED technology, which guarantees the highest image quality. Each pixel works independently, which makes it possible to achieve perfect blacks, infinite contrast and vivid and realistic colors. With Full HD resolution (1920x1080 pixels) at the 55-inch matrix, images are sharp and detailed, thus attracting the eye and leaving a lasting impression.

One of the key features of Transparent OLED Digital Signage is its impressive transparency level of 38%. This makes the screen usable in ways that were previously unattainable - displaying digital content against real objects creates impressive and interactive installations. The high transparency also allows the monitor to be used versatilely in a variety of spaces, such as stores, museums and conference rooms, where it serves both an informative and decorative function.

This monitor is not only advanced technology, but also unique design. With a slim design of only 6.6 mm and an elegant, minimalist frame, this monitor fits perfectly into any interior. The ability to be mounted in landscape or portrait orientation, as well as options for installation on glass, ceilings or walls, make this screen extremely versatile, meeting the requirements of even the most demanding projects. A tempered glass (2H) front cover, meanwhile, protects the screen from impacts.

The Transparent OLED Digital Signage is equipped with advanced content management features that allow easy and efficient control of the content displayed. The integrated webOS system offers an intuitive interface and a wide range of management tools, making it easier than ever to create dynamic presentations. The monitor also supports expansion mode, which allows you to synchronize and display content on multiple screens simultaneously, ideal for larger installations.
