

PRODUCT NAME

# ALUSTAGE AL34029 QUADRO 290A TRUSS (290MM)

DESCRIPTION

Alustage AL34029 is a 290 mm long quadro truss, part of the 290A system and AL3 series. The weight of this element is 2.5 kg.

Elements from the 290A system are made of hardened EN AW 6082 T6 (AlSiMgMn) alloy, which is known for its excellent machinability, high strength and good anodizing ability.

Trusses in the 290A system use 50x2 mm diameter tubes and 20x2 mm diameter fins, and connections are made using the SZ02.10 socket. Alustage trusses are ideal for stage applications such as stage technology systems at trade shows, stages and events, as well as for suspending video screens, LED screens, projection screens and sound gates. They can also be used as racks for advertising or stage decorations.

Each component is certified and regularly inspected to ensure safety.

Rent Alustage truss elements from SQM Rental House for your event!

## SPECIFICATIONS

| | |
|---|---|
| **Element** | Straight truss |
| **Color** | Black |
| **Material** | EN AW-6082 T6 |
