

PRODUCT NAME

KINETICQ / LIGHTING SYSTEM / TUBE 1.5M

DESCRIPTION

KineticQ Tube is a single light tube, ideal for creating dynamic stage effects. Equipped with energy-efficient RGB SMD LEDs, it offers a full color spectrum and excellent brightness with 108 LEDs per tube. Its 1.5-meter-long construction of durable aluminum ensures high durability and easy installation. With built-in DMX control, the tube offers precise control of lighting effects. It is designed for flexible use at concerts, clubs or other events requiring intense visual effects.

The KineticQ Tube features high light output, which, with 108 RGB LEDs, provides full, crisp colors. The tube operates in DMX512 mode, which allows precise control of the effects with a standard controller based on 8 channels. The operating voltage range is 100 to 240 volts, ensuring wide compatibility with various power systems.

With its durable aluminum housing and IP65 rating, the KineticQ Tube is weatherproof, making it ideal for outdoor use, including concerts, festivals and other outdoor events. The light tube has an auto-test function and the ability to operate in master-slave mode, which increases its flexibility and ease of use in various lighting configurations.

SPECIFICATIONS

Standard	MADRIX
Standard	DMX512
Colour rendering index (CRI)	80
Channels	60
Lifting speed (mm/s)	600
Length (mm)	1500
Height adjustment (mm)	0-6000
Power supply	100-240V AC; 50-60Hz
Diameter (mm)	54
Max. power consumption (W)	100
Width (mm)	145
Height (mm)	280
Depth (mm)	230
Connectors	1 x DMX (3-pin)
Net weight (kg)	5.6 (Winch)
Net weight (kg)	0.6 (Tube)
