

PRODUCT NAME

HERDIO HOS-501

DESCRIPTION

The Herdio HOS-501 speaker is a high-quality unit designed for both indoor and outdoor use, providing powerful sound and durability in harsh weather conditions. Equipped with a 5.25-inch aluminum woofer and a 1-inch dome tweeter, it offers clear sound and a full range of sound. With a peak power output of 300 watts, the HOS-501 easily covers an area of about 400 square feet (about 37 m^2).

The speaker features a waterproof design (IP66 rating), making it ideal for patios, gardens, garages, as well as commercial spaces such as conference rooms and classrooms. Equipped with swivel handles, it offers a 120-degree range of motion and the ability to rotate the front 90 degrees, making it easy to precisely direct sound.

In addition, the speaker's housing is made of durable ABS plastic, and a metal cover protects it from mechanical damage. The Herdio HOS-501 is also environmentally friendly, undergoing rigorous testing and holding certifications such as FCC, CE and BQB, confirming its quality and safe use.

Rent the speaker at SQM Rental House!
