PRODUCT DESCRIPTION

The ALUSTAGE truss system, which includes QUADRO-type trusses, makes it possible to create a circular structure with an outer diameter of 11000 mm and an inner diameter of 10420 mm.

The truss elements of the 290A model were made of 50x2 mm tubes and 20x2 mm laths. The structure was equipped with a connection socket of SZ02.10 type.

The wheel consists of 12 parts in the form of arched beams R5.5m / 30°, which makes it ideal for the construction of stages, stage structures and exhibition stands during trade fairs.
