PRODUCT DESCRIPTION

The ALUSTAGE truss system, based on QUADRO-type trusses, makes it possible to create a structure in the form of a circle with an outer diameter of 19000 mm and an inner diameter of 18420 mm.

The truss of the 290A model is made of 50x2 mm tubes and 20x2 mm laths, and its structure includes a SZ02.10 connection socket.

The wheel consists of 20 segments in the form of R9.5m / 18° curved beams, making it ideal for stage construction, stage structures and exhibition stands at trade shows.
