24" APPLE IMAC 4.5K 256GB SSD (A3247, 2024)

DESCRIPTION

The Apple iMac 24-inch (model A3247) in 2024 silver is a sleek all-in-one computer that combines modern design with superior performance. Featuring a 4.5K (4480 × 2520 pixels) Retina display, it offers unparalleled image quality with a wide P3 color gamut and True Tone technology that adjusts color temperature according to ambient light. Brightness of 500 nits ensures excellent visibility, regardless of lighting conditions.

Powered by Apple's new M4 processor, the iMac offers a significant leap in performance, combining an 8-core CPU and GPU. With this unit, the computer is the ideal choice for both everyday work and advanced applications such as video editing and 3D graphics creation. Compared to previous generations, the iMac with M4 runs up to 6 times faster in the most demanding tasks.

The iMac's standard configuration includes 16GB of unified RAM, which guarantees smooth performance even with many applications open. This model is equipped with a 256GB SSD, which offers lightning-fast data access and fast system and application startup, providing ample space for key files and programs.

The computer is equipped with two Thunderbolt 4 / USB 4 ports, providing data transfer speeds of up to 40 Gbps to connect advanced accessories and external devices. In addition, the iMac features a 3.5mm headphone jack and an optional Ethernet port integrated into the power supply for easy desktop cable
