Supported Video Sources	8 bit, 10 bit, 12 bit

PRODUCT DESCRIPTION

The Pixelhue P10 is an advanced presentation switcher supporting 4K 60p 4:4:4 10-bit video with excellent image processing. Equipped with HDMI 2.0, DP1.2, 12G-SDI, and 4 × 10G fiber ports, it can transmit signals up to 10 km without converters.

It supports both switcher mode (4K × 2K) and splicer mode (8K × 2K) with smooth transitions, effects, and flawless mosaics. It offers up to 6 layers and 128 presets, and live input/output captures can be used as backgrounds.

Control is easy and flexible via the front panel with LCD, U5 console, web GUI, or stream deck. Its robust construction ensures reliability in touring, rental, and 24/7 operation.
