PRODUCT DESCRIPTION

The 55-inch Samsung UE55JU6872 is the first flat-screen TV that uses Panel Nano Crystal technology. Thanks to this, the image with an UltraHD 4K resolution of 3840x2160 is extremely transparent, intense, perfectly bright and offers a huge palette of colors - over 20% wider than UHD TVs from the HU series.

UE55JU6872 offers many innovative technologies - along with Auto Motion Plus technology, Samsung TV allows for an extremely smooth presentation of fast and dynamic animations and special effects. UHD Dimming is responsible for dividing the screen and then calculating the ideal choice of color and sharpness. UHD Upscaling, on the other hand, scales lower resolution images to UHD resolution, improving overall image quality. Thanks to this, you can enjoy extremely precise details.

Available in SQM Rental House UE55JU6872 TV is compatible with WiFi 802.11ac standard and is equipped with 4 HDMI connectors (including MHL and ARC), three USB ports, and a CI slot. The VESA spacing is 400x400mm.

This TV is also characterized by very low power consumption, the highest quality HD Audio, and minimalist design - SQM Rental House encourages you to rent this device!
