

PRODUCT NAME

P1.2 / LED SPHERE / 0.8M

DESCRIPTION

The LED sphere is a modern and eye-catching display solution designed to elevate visual communication to a new level. Its unique spherical form immediately attracts attention, making it an ideal choice for events, exhibitions, showrooms, and high-end commercial spaces.

With a pixel pitch of 1.2 mm, the device ensures very fine image detail and sharp content presentation. The screen dimensions of approximately 800 mm in width and 810 mm in height, combined with a diameter of 800 mm, create a compact yet highly impactful display surface. The total display area of 2.0096 m² allows for effective presentation of both static visuals and dynamic multimedia content.

The construction has been designed with practicality in mind. A total height of 1010 mm including the stand provides stability while maintaining a sleek and modern look, making it easy to integrate into various environments.

Thanks to its precise pixel density and refined design, the LED sphere delivers smooth, visually engaging content that stands out in any setting. It is a perfect solution for brands and creators looking to present their message in a unique, innovative, and memorable way.

Choose the LED sphere and bring a new dimension to your visual presentations.
