LED TOTEM 83"/46" FOLDED is a mobile and versatile LED display designed for trade shows, events, showrooms and modern exhibition spaces. The 83-inch screen features a resolution of 320×1080 px and a refresh rate of 3840 Hz, delivering smooth, detailed visuals for video, animations and informational content. Its unique foldable design allows the 83-inch single-sided display to be quickly transformed into a compact 46-inch double-sided display. When folded, each side offers a resolution of 320×540 px, allowing content to be displayed in two directions simultaneously. This format is ideal for walkways, exhibition stands and spaces where audiences can approach the screen from different directions. For even greater visual impact, multiple totems can be seamlessly connected to create a larger LED display. Combining 6 totems creates a video wall in a 16:9 format. The system is designed for quick and easy screen connection, allowing a larger LED display to be set up without complicated installation or dismantling. The totem also offers flexible content playback and control options, including HDMI, USB, LAN and Wi-Fi, while the built-in Android system provides convenient operation and screen mirroring functionality. Its mobile design with wheels, foldable construction and plug-and-play functionality make transportation and setup quick and easy. LED TOTEM 83"/46" FOLDED can be used as a tall advertising display, a compact double-sided screen or as part of a larger video wall, making it easy to adapt the display format to the requirements of a specific event or space.
