

PRODUCT NAME

RGB LED SPHERE / 250 MM

DESCRIPTION

The RGB LED Sphere is a 250 mm diameter light sphere equipped with RGB SMD LEDs. Its 360° beam angle makes the effect visible from every direction. It is ideal for concert stage design, exhibition stand decoration, and lighting for events and product launches.

Each sphere acts as a single, individually controlled pixel. Combining multiple spheres allows you to create three-dimensional lighting installations with flowing colours and moving light effects. With a suitable external controller, the spheres can be integrated into an Art-Net or DMX control system.

The IP65 rating makes the sphere suitable for both indoor and outdoor use. It is designed for suspended installation and weighs 0.7 kg.

SPECIFICATIONS

Technology	SMD LED
Color space	RGB
LED type	5050 RGB
Beam angle (°)	360
Grey scale	256
Diameter (mm)	250
Max. power consumption (W)	10
Protection Level (IP)	IP65
Net weight (kg)	0.7
