

PRODUCT NAME

APART OVO8P-W

DESCRIPTION

OVO8P is a white-color active speaker of the Apart Audio brand (currently known as Biamp), which under the bass-reflex housing hides an 8-inch woofer and a 1-inch tweeter. The set offers great voice reproduction and doesn't require the help of a subwoofer to enjoy low bass and pure clarity of sound. The output power of OVO8P is 60 watts.

The rear panel of the speaker is equipped with two balanced XLR connectors - one input and one output. The user has at its disposal two unbalanced RCA connectors and three knobs - to control the bass, treble, and volume.

Thanks to mounting brackets that can be set at different angles of inclination, OVO8P has a wide range of applications - from conference rooms to hotels. SQM Multimedia Support fully recommends this device.
