

## ADJ IKON LED

### TECHNICAL DETAILS

Diode type	1 x White LED
Power (W)	60
Beam angle (°)	25; 32; 43
Color temperature (K)	7500
Gobo size (mm)	54
Gobo viewable area (mm)	33
Max. power consumption (W)	83.6
Supply voltage	100-240V AC; 50/60Hz
Width (mm)	227
Height (mm)	215
Depth (mm)	236
Net weight (kg)	3.6

### PRODUCT DESCRIPTION

SQM Rental House presents you with Ikon LED - it is a gobo (logo) projector of the ADJ brand, which is equipped with a one white 60W LED that has a color temperature level at 7500K.

The high-power lamp has a long life of 50,000 hours and cold-white color. Thanks to three interchangeable lenses that ensure a clear projection of the logo in sharp and high quality, it is also possible to adjust the beam angles - from 25, through 32, to 43 degrees. By default, the projector is equipped with four metal gobos - the simplicity of their replacement and the ability to easily create individual designs makes the Ikon LED extremely versatile device.

The back panel is equipped with an IEC C13/C14 power output/input, a very effective fan, an antenna, and two knobs through which you can adjust the brightness and angle of projection. Projection parameters can also be controlled by a wireless remote control and focus can be changed through a manual lens.

The rotating Ikon LED gobo projector is a great solution for DJs when organizing multimedia events in clubs, bars, or other special events. Its dimensions (including the weight of less than 4 kg) and the ability to work all night make it a fully reliable and mobile device.
